Tungsten - Carbide Needle Holders Needle Holders

WELDON has equipped the GOLD PLATED needle holders with different tungsten-carbide inserts according to their surgical indication:

1. smooth
2. PO2 = Pitch 02 = 0.2 mm distance
3. PO4 = Pitch 04 = 0.4 mm distance
4. PO5 = Pitch 05 = 0.5 mm distance

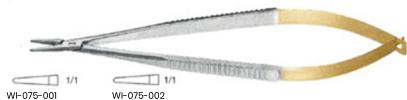

between pyramidal teeth

insert PO2- 05 are ground for vise-like and reliable stability of the needle while in use

CROWN PLIERS

- * Ergonomic design with cranked jaws for assured grip
- * Jaw configuration provides circular aperture
- * Grips crowns and bridges securely regardless of material
- * Cannot damage the tooth neck area
- * Crown Forceps can be used for a variety of application, e.g.
 - *To insert and remove temporary dressings
 - *To **dit tight-fitting crowns**
 - *To grip remove superficial root remnants, specially in the treatment of children
 - *As an exceptionally usefull aid in the hands of the dentist's assistant

WI-095-001

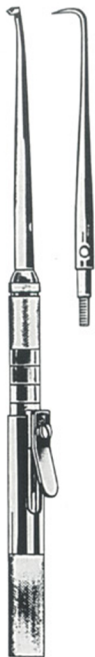

WI-095-020

PLIER FOR THE EXTRACTION OD CROWNS

- *Take off crowns and bridges in the area of the upper and lower jaws during the intraoral trial
- *The advantages of this plier are evident, as one model only is sufficient instead of the different pliers one had until now for the upper and lower jaws.
- *The **exchangeable elastic insert prevents damage to the crown surface**
- *the beaks submitted to wear can be exchanges and are sterilizable upto 180C
